ABOUT

I like it when there's a lot going on, which is why I thrive when working on diverse projects. My experience at a marketing agency taught me one thing: in code, as in life, you have to be ready for anything. I create and modify websites in WordPress, implement functionalities in JavaScript and PHP, and ensure the speed and performance of websites. I treat challenges as part of everyday life, and a large amount of work only motivates me to act.

WORK EXPERIENCE

Junior Webmaster

Emblemat (10.2023 - Present)

I create and develop WordPress-based websites, working with tools such as Elementor, WPBakery, Divi, Gutenberg, and WooCommerce. I am responsible for the comprehensive implementation of solutions – from designing the appearance, through adjusting styles in HTML and CSS, to implementing dedicated functionalities in JavaScript and PHP. On a daily basis, I also deal with:

- creating custom WordPress plugins tailored to individual customer needs,
- optimizing website performance and improving loading times,
- creating landing pages in WordPress + Elementor and on the Landingi platform,
- managing and configuring websites on various hosting platforms,
- ongoing maintenance and updates of websites.

Freelance Website Administrator

Medsal.pl & Geotrasmbork.pl (04.2024 – Present)

I am responsible for maintaining and developing WordPress websites – I update content, modify layouts in Elementor, and optimize UX/UI. I take care of security, stability, and the introduction of new features.
